

ZEN HQ™

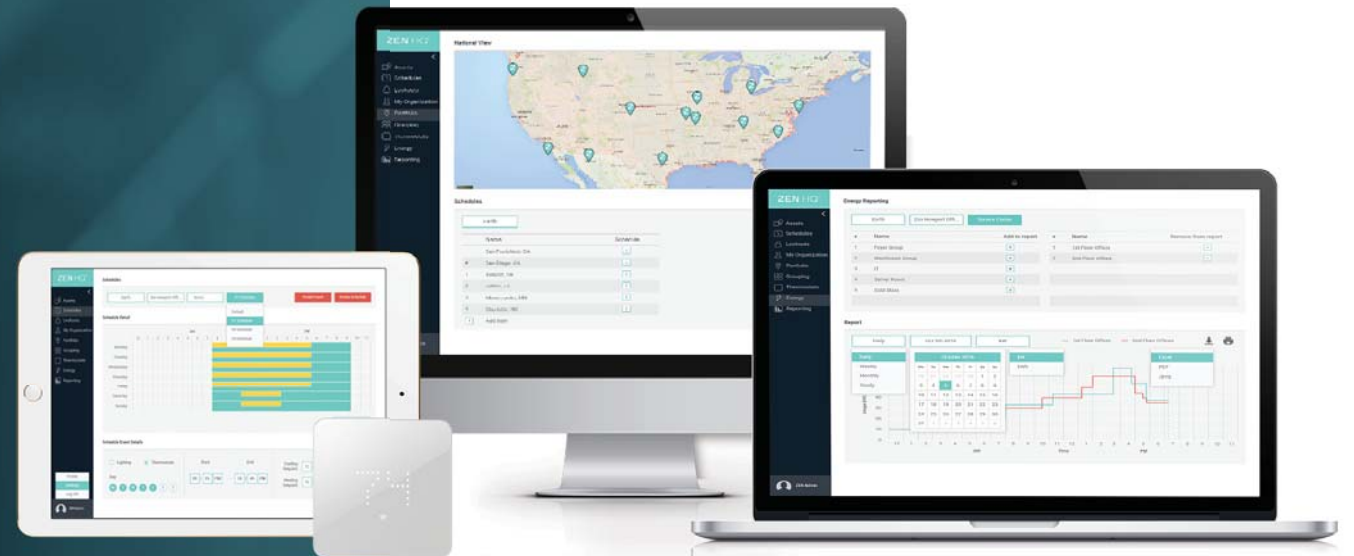

THE SIMPLEST ENERGY
MANAGEMENT SOLUTION
WITH THE FASTEST PAYBACK

ZENECOSYSTEMS.COM

ENERGY MANAGEMENT SOLUTIONS ARE NO LONGER JUST FOR BIG BUILDINGS

SIMPLE, SMART, CONNECTED CONTROL

.....

86%

OF SMALL & MID-SIZED BUILDINGS IN THE USA HAVE NO SMART ENERGY MANAGEMENT

Our mission is to make smart energy practices ubiquitous by providing the most customer-focused energy management solutions available.

Zen HQ™ is so simple, it can be installed within a day.

HVAC and lighting systems are the largest controllable source of energy drain in commercial buildings, and yet 86% of all small and mid-sized buildings in the USA have no energy management solution in place to control them. This is because energy management systems have historically been expensive and hard to install, often requiring complex networks and weeks of installation that disrupt daily business.

Without a way to manage energy, costs can skyrocket.

We've designed Zen HQ™ to overcome those obstacles. Zen HQ connects smart devices – like lighting controls and our own Zen Thermostats – to an intelligent energy management platform that allows unprecedented control of these building systems. It's so simple that it can be installed in under a day and so powerful that it delivers energy savings of up to 30%.

ACHIEVE INSTANT CONTROL ACROSS YOUR ORGANIZATION

Zen HQ™ is a cloud platform for managing HVAC, lighting schedules and energy consumption across multi-site operations.

IMMEDIATE ENERGY
SAVINGS OF UP TO

30%

Managing your
energy consumption
has never been easier

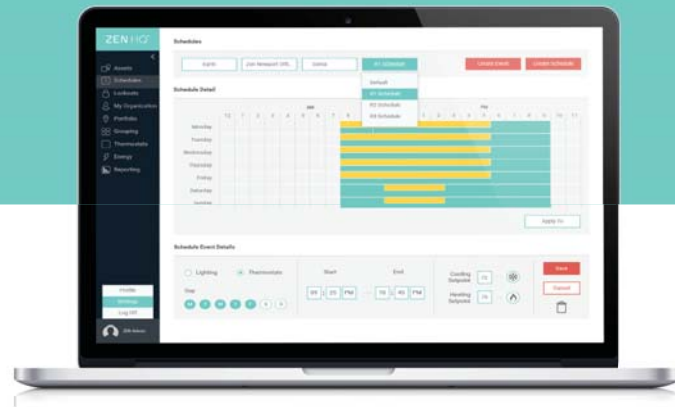

SCHEDULING

You can apply a standard schedule template or customize your own at a National, Regional or Site level.

When creating a schedule, you can select which days the schedule is valid for, and select start and end times in 15-minute intervals.

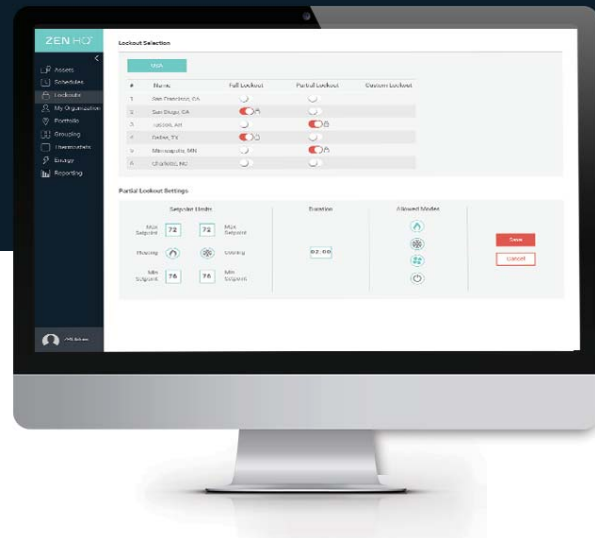

You can then select cooling and heating setpoints for HVAC and on, off or brightness level for lighting.

LOCKOUT CONTROLS

One of the most powerful features within Zen HQ™ is the ability to prevent on-site deviations from schedules by using the partial or full lockout feature.

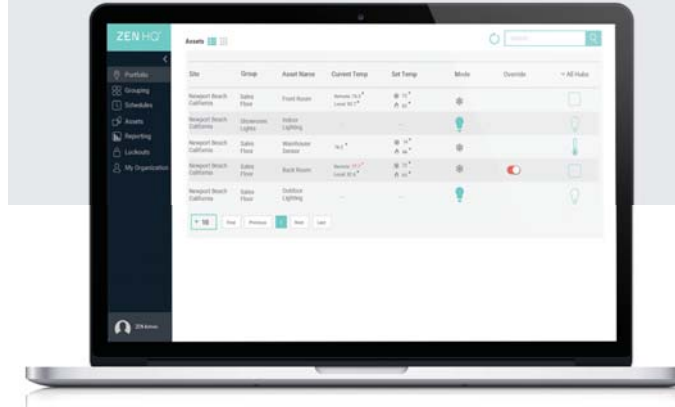

This ensures your organization stays on schedule by preventing unauthorized adjustments.

DEMAND RESPONSE

Receive valuable incentives by participating in Demand Response and energy efficiency programs.

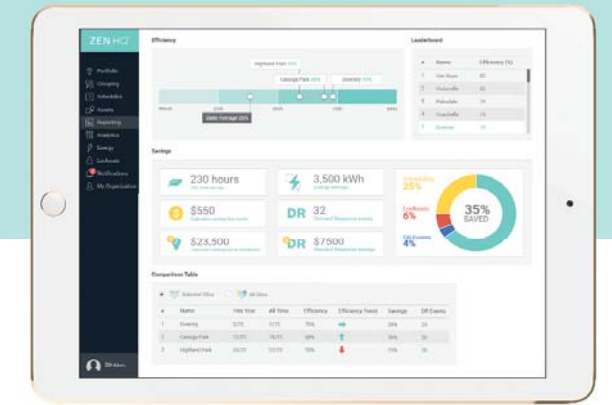

The Zen HQ™ portal notifies your devices of an active Demand Response event and displays it on your schedule. Automatic adjustments are made to your devices and displays participation on your schedule.

INTEGRATED PLATFORM

Combine HVAC and light controls, energy and environmental sensors to deliver whole building energy management.

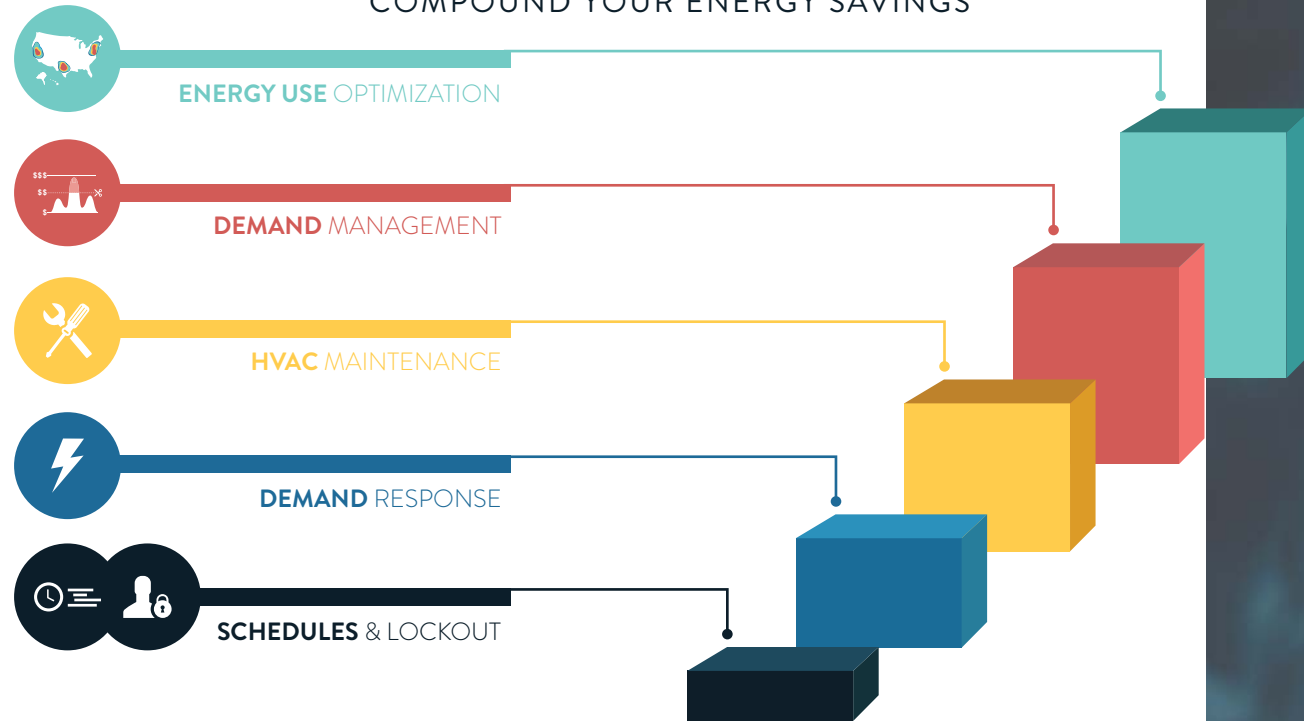

Add total portfolio energy monitoring, demand management or other enhanced features to further increase your energy savings.

AFFORDABLE SOLUTION, UNPRECEDENTED ROI

Zen HQ™ allows you to manage HVAC controls, lighting, Demand Response participation and more. Customize system components and features according to your goals and budget, delivering the energy management solution – and ROI – your business needs.

COMPOUND YOUR ENERGY SAVINGS

The adoption rate of smart energy practices is slow because traditional options are complex, expensive and take way too long to payback your investment.

JAMES MCPHAIL, CEO

ABOUT ZEN ECOSYSTEMS

Zen Ecosystems provides intelligent energy management solutions to businesses and consumers.

We help you reduce your energy bills and allow you to take control of your energy through simple, connected, beautiful products ranging from our elegant smart thermostat to our powerful Zen HQ platform.

We partner with national brands, distributors, network operators and utilities to bring new energy solutions to market for commercial and residential buildings.

For more information, visit zenecosystems.com.

Beyond the significant energy savings we've realized using Zen HQ, we've found the team to be extremely thorough, responsive and a pleasure to deal with.
